

Beyond 20/20

Beyond 20/20 professional browser is required in order to open and browse the data files of .IVT format. You may need to have the permission of your IT administrator to install this software.

General System Requirement for this software is any version of Windows more recent than Windows 2000.

In case you use a MAC, you can still install Beyond 20/20 via **Bootcamp**:

“ On a newer MAC, you can install Bootcamp software which will allow you to install a version of Windows, which in turn will allow you to run any software on the windows platform. Using older MACs, you can install Virtual PC software which will perform the same function.
