

# Community Data Program

Enabling communities across Canada to measure and track local well-being

## Community Snapshot

Toronto City Stats in Detail: Employment Establishments by Size & Industry product

## Summary

[The City Stats in Detail tool is designed](#) to take advantage of the two unique features of Canadian Business Patterns data which are: No Suppression and very detailed NAICS.

These data allow the user to produce a profile of the businesses in an area and can be used to:

1. identify gaps re retail location analysis
2. study local agglomeration economies.
